The Short Portable Assessment of Capacity for Everyday Decision-Making (ACED)

The following is a template for a short version of the ACED that can be adapted to any functional problem, including medication management, money management, and meal preparation.

The ACED was developed by:

Jason Karlawish, MD
University of Pennsylvania

James Lai, MD
Yale University
To administer the ACED you need to identify a functional problem the person is having, and at least one option to solve that problem. You will then adapt the interview questions according to the functional problem the person is experiencing and the options to take care of that problem. For each question, decide whether the person’s answer is adequate, marginal, or inadequate using the following scoring criteria:

<table>
<thead>
<tr>
<th>Understanding Scoring Criteria</th>
<th>Appreciation Scoring Criteria</th>
<th>Reasoning Scoring Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>0 (inadequate performance):</strong></td>
<td>0: Person offers reasons that are delusional or a serious distortion of reality, or cannot answer the question.</td>
<td>Comparative: 0: Person provides no comparative statements or an illogical one.</td>
</tr>
<tr>
<td>Person gives a clearly inaccurate response with serious distortion.</td>
<td>1: Person may or may not believe the option will benefit/adversely affect his or her situation but the reason is vague and may represent distorted versions of reality.</td>
<td>1: Person provides comparison statement without specific consequences.</td>
</tr>
<tr>
<td><strong>1 (marginal performance):</strong></td>
<td>2: Person acknowledges at least some potential benefit/adverse affect from the option and offers reasons that have some reasonable basis.</td>
<td>2: Person provides clear comparison statement with specific consequences.</td>
</tr>
<tr>
<td>Person shows some recollection of the item content but gives an incomplete and vague response.</td>
<td></td>
<td>Consequential: 0: Person provides no everyday consequences or an illogical answer.</td>
</tr>
<tr>
<td><strong>2 (adequate performance):</strong></td>
<td>1: Person may or may not believe the option will benefit/adversely affect his or her situation but the reason is vague and may represent distorted versions of reality.</td>
<td>1: Person provides a general statement without details.</td>
</tr>
<tr>
<td>Person recalls the content of the item and offers a fairly clear version of it.</td>
<td>2: Person provides a clear and vivid statement of everyday consequences.</td>
<td>2: Person provides a clear and vivid statement of everyday consequences.</td>
</tr>
</tbody>
</table>

The scoring criteria are to help guide your judgment whether the person has sufficient decisional abilities to make their own choice.

**What is the functional problem?** Fill in here: ____________________________________________

________________________________________________________________________________________

**What are some options to solve the problem?** Fill in at least one here:

Questions contact:
Jason Karlawish MD
Jason.Karlawish@uphs.upenn.edu
Does the person understand the problem?
Describe the functional problem the person is experiencing. Ask the person to say this back in his/her own words. Describe the consequences of the problem. Ask the person to say this back in his/her own words.

Does the person appreciate the problem?
Does the person believe that he/she has the problem you described? “Do you have any problems with [state the functional problem]?”

Does the person understand the options to manage the problem?
Describe the options to manage the functional problem. Ask the person to say this back in his/her own words.

Does the person understand the advantages of the option?
Describe the advantages to the options. Ask the person to say this back in his/her own words.

Does the person understand the disadvantages of the option?
Describe the disadvantages to the options. Ask the person to say this back in his/her own words.

Does the person appreciate the benefits and downsides of the options?
Does the person think that one of the options to manage the problem will benefit him/her? “Now just consider this choice [restate an option]. Do you think [insert option to deal with functional problem] could benefit you?”

Does the person think that an option might make things worse for him/her? “Now just consider this choice [restate an option]. Do you think [insert option to deal with functional problem] might make things worse for you?”

Comparative Reasoning
How is the person’s choice better than another option (such as not getting help)? “What makes your choice better than [state another option]?”

Consequential Reasoning
What would happen if the person had to choose another option? “How would [insert option to deal with functional problem] affect your everyday life?”

Expressing a Choice
Final choice to manage the functional problem. “Now that we’ve had a chance to talk about [functional problem] what would you like to do?”
