GIL SIEGAL, MD, LLB SJD is a surgeon and a health law professor, chairs the Center for Health Law and Bioethics at Ono College, Israel, and faculty member with the University of Virginia Law School. In addition, Dr. Siegal serves on many national committees, such as a Member of the Israeli National ("Helsinki") Committee for Research in Humans (authorizing all genetic research involving humans in Israel), and is a Member of the National Bioethics Committee. He received his medical and law degrees from Tel Aviv University, Israel, his PhD in law at the University of Virginia, and completed an otolaryngology residency at Bnai Zion Medical Center, Haifa, Israel. In 2004 he was a research fellow at Harvard University Schools of Medicine and Public Health. In 2012 he founded C-MD (www.c-md.co.il), a digital platform for accessible medical information, currently used by 4 hospitals and HMO in Israel.

Dr. Siegal's areas of expertise include medical technology; genetics, law and ethics; biotechnology; Health IT, patients’ rights; mal practice and risk management; and comparative medical ethics.
